

SYMBOL TC70 TOUCH COMPUTER APPLICATIONS & DEMOS

Your staff is the frontline of your business, where the difference between a satisfied customer and a lost opportunity is determined. Arm them with the enterprise mobile computer that will enable them to respond faster and act smarter to better serve your customers. The Symbol TC70 gives them an edge by combining the amazing ease of use of a consumer device with the no-nonsense durability, dependability and performance that enterprises demand. **The right device makes all the difference.**

You need enterprise applications to run on your TC70. Working with our extensive network of application partners, we have created a library of apps that are now ready to go, and because it's based on Android™ that library will continue to grow rapidly over time. All apps get certified by Motorola so you can be assured they will work properly.

Many of these apps come with demos to help you visualize potential use case scenarios. When the demo becomes certified it is made available on Motorola's App Gallery.

USING APP GALLERY:

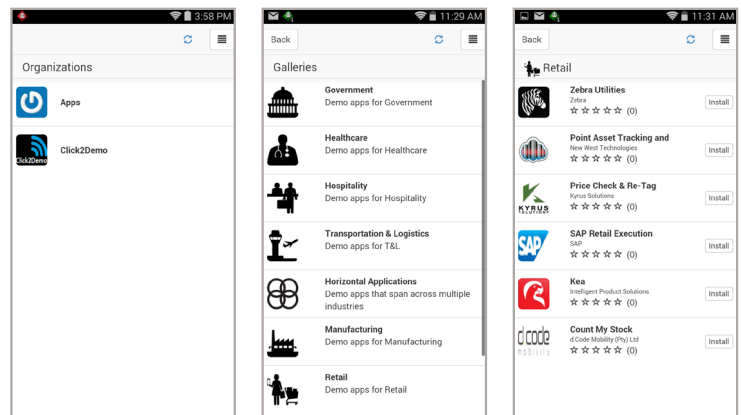

App Gallery is preloaded on your TC70. Simply connect to a wireless network and open it. Select **Click2Demo** folder and choose the category and specific app you want to see. Additional information about each app is seen when you select it.

Important:

Some apps require login information or access to a web site to set configuration or other steps, Full descriptions and app details can be viewed at: <https://developer.motorolasolutions.com/community/click2demo>

For more information on the full solution represented by any demo, please contact the application partner directly.

You can find them all listed on **Application Finder** <http://mpe.motorolasolutions.com>
