A UNIFIED COMMUNICATION ENTERPRISE MOBILITY SOLUTION

With easy-to-use features that include instant PTT calls, live presence, GPS mapping, text messaging, emergency alarms, man down, lone worker, and data file transfer, LINX simplifies multiple communication technologies into a single real-time solution.

The primary business critical app, Push-to-talk, has become a relied upon, instant radio-style communication amongst various industries. PTT users value the convenience and productivity of setting up calls with the push of a button to immediately relay a message over the speaker of another's handset. PTT calls are business-focused and relied on to connect immediately. LINX boasts lightening fast connectivity as its #1 feature. Try it today and see for yourself!

Designed to operate on rugged, purpose-built devices while maximizing the expansive coverage and connectivity of broadband and WiFi networks, LINX delivers a feature-rich solution right to the palm of fleets, workers and managers who need it most!

LINX isn't only an alternative to traditional communication, but also a great tool to optimize internal correspondence and work flows for diverse global organizations.
