exacq

exacqVision M-Series

All-in-One PoE Network Video Recorder

Features That Make a Difference:

- Store your video and data longer with hard drive configurations up to 6 TB

- Keep an extra eye on your operation with support for 8 IP cameras

- View cameras on any PC or MAC with free exacqVision Start client software

- Compatible with Illustra and thousands of other IP camera models, making it easy to find the right camera for your needs

- Free Exacq Mobile app allows users to view video from anywhere

- Includes a 3-year hardware warranty and 3 years of unlimited software update

More Storage Available on our Affordable, Easy to Use Network Video Recorder.

Affordable Security, Easy Setup

exacqVision M-Series is a low-cost, easy to setup and easy to use surveillance solution, ideal for small business. The recorder is preloaded with exacqVision Start video management system (VMS) software and allows for quick camera setup using EasyConnect. Simply plug in cameras (up to 8) and the system will automatically find, connect and begin recording.

Plenty of Storage for all the Details

High megapixel cameras, including our Illustra® Cameras, allow users to see details that would otherwise be missed. With all this detail comes large amounts of data.

Serious Features for Better Results

exacqVision's intuitive and powerful feature set allows users to take advantage of tools designed for security environments. The free client software allows PC or Mac users to easily manage live and recorded video. Digitally zoom in on cameras for an expanded view, quickly search and export video with time-line searching and ExacqReplay.

M-Series and exacqVision Start can also integrate with point-of-sale data, making it easy find video associated with sales and theft incidents.

View Video Anywhere, Anytime

Along with the free client viewing software, exacqVision offers a free mobile app, giving users the ability to view their video and data on the go. Exacq Mobile, available for iOS and Android devices, gives users peace of mind, knowing they can always keep an eye on their business.

Big on Protection, Not Your Bottom Line

The affordable M-Series recorder helps security-conscious customers easily manage live and recorded video. Automatic system updates, simple camera setup and licensing and top notch support make M-Series a simple choice for small operations that need video surveillance.
