

MORE INTELLIGENCE IN HAND IMPROVES SAFETY FOR ALL

PREMIERONE HANDHELD

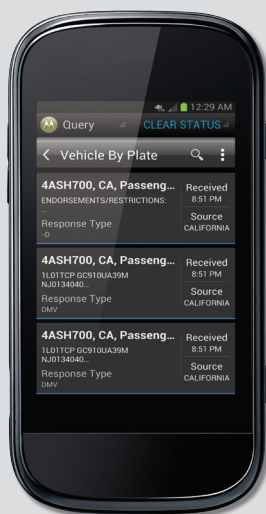

First responders have to be ready for anything. Access to the right information at the right time in the right place is vital to ensuring faster, safer outcomes. Once outside or away from their vehicles – and the communications centers they are connected to – responders are often cut off from critical data. PremierOne™ Handheld makes it easy to take it with them on their Android-powered smartphone or tablet. The purpose-built application lets officers quickly and securely look up critical details about people, property and vehicles while on the move. It delivers the intelligence officers need to stay ahead of what's next no matter where they are – in their car, or on foot, bicycle, horseback, motorcycle or investigative patrol.

KEEPING CRITICAL DETAILS AT HAND

As an incident unfolds, officers need information quickly. They need to know who or what they're dealing with at all times. PremierOne™ Handheld delivers instant access to federal and state databases including the National Law Enforcement Telecommunications System (NLETS), the National Crime Information Center (NCIC) and BOLO data. The application eliminates the guesswork, allowing officers to query:

- People by name or driver's license
- Vehicles by plate or VIN
- Boats by hull number
- Stolen property – bikes, boats, phones – by serial number
- Guns by serial number

Without the need for dispatch assistance, officers have the flexibility to control their access to critical data when and where they need it, improving situational awareness and response time.

ENABLING REAL-TIME COLLABORATION

Secure messaging functionality puts visual intelligence quickly into view. A picture of a suspect helps officers better prepare before approaching a front door. The photo of a missing child serves as a quick reference point while out on patrol or searching a specific area. A quick message from another field officer improves collaboration. PremierOne Handheld meets the critical communications needs of agencies of all sizes by making it easy for users to send and receive secure messages between devices, department personnel and external contacts. Key features include the ability to:

- Compose, view, forward, reply and delete messages
- Capture, view and send images
- Access address book functions

To move from reactive to proactive, agencies need to efficiently collect, view and distribute critical information quickly. Messaging capabilities improve collaboration both on the scene and across agencies to coordinate and resolve incidents safely.

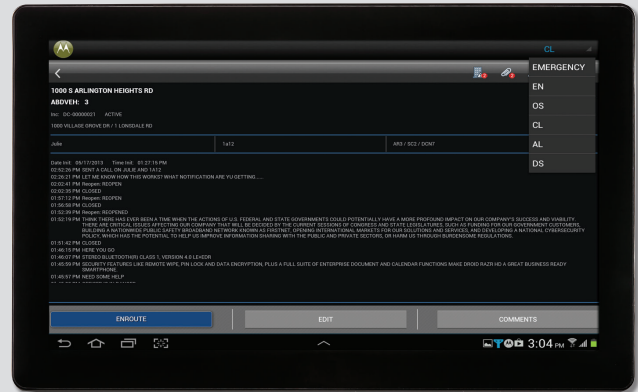

INTEGRATION WITH PREMIERONE CAD

Imagine if your officers had powerful new tools so they could extend command to the front line. Building on its core query and messaging functionality, PremierOne™ Handheld provides a mobile solution integrated with PremierOne CAD. This integration brings mapping, status update and dispatch functionalities from CAD to PremierOne Handheld. Command capabilities are extended directly to the field to accelerate officer response and decision making. On their PremierOne Handheld enabled device, officers can:

- Receive and view incidents
- Create incidents from a traffic stop, field initiation
- Update incidents with comments, incident type and location
- Add information on people, vehicles and include attachments
- Close incidents with and without dispositions and notes
- Update unit status
- Review previous incidents
- Access premise hazard and location details
- Identify responder location

Improving officer safety and incident response is a priority of agencies no matter how large or small. With a fully integrated PremierOne Mobile, CAD and Handheld solution, agencies can empower their officers to do more out in the field, streamline workflows and increase operational efficiencies. They can track and monitor mission critical information in real-time, improving not only their safety but also the communities they serve.

A BETTER WAY TO SERVE AND PROTECT

Integrated with PremierOne CAD, the Motorola PremierOne Handheld Solution makes tracking and monitoring incident responses more efficient and provides more meaningful, mobile intelligence. With it, officers and commanders can:

- Access real-time Unit Status and Incident Monitors
- Link instantly to unit and incident details
- View assigned, pending, active and closed incidents
- Get immediate status updates with a single touch
- Review maps with directions to incident location
- Log on to PremierOne Handheld and PremierOne Mobile as a single user and single unit
- Quickly link individuals to an incident by manual input or by scanning driver's license bar-code

A POWERFUL INTEGRATED PLATFORM

Only Motorola can deliver a truly unified platform that streamlines operations by providing one, real-time operational view. The PremierOne™ platform and applications – CAD, Mobile, Handheld, Records and Jail – transform the way your agency operates, collaborates and shares information. PremierOne Handheld, integrated with CAD, places more intelligence in the hands of first responders to keep citizens and communities safer and more secure.

PURPOSE BUILT FOR RELIABLE PERFORMANCE

The PremierOne Handheld is designed to work the way public safety works, to keep responders' mission critical voice and data lifelines intact, no matter where an incident takes them. Intuitive applications improve situational awareness and improve communications. This new addition to the PremierOne platform empowers the field to do more at the point of work, keeping officers out in the community and better prepared for whatever comes next.

PREMIERONE HANDHELD AT A GLANCE

Designed specifically to meet mission critical communications needs, the PremierOne Handheld application has:

- **Android 4.0+ smartphone and tablet device compatibility**
- **CJIS compliance with advanced, two-factor authentication and FIPS 140-2 encryption**
- **Inactivity timeouts and device wipe on logout capabilities**
- **Single display mode for day and night time use**
- **3G, 4G and LTE network capability**

STAYING AHEAD OF WHAT'S NEXT WITH MISSION CRITICAL INTELLIGENCE

New, more sophisticated threats and criminals emerge every day while agencies try to manage increasing workloads at the same time with fewer workers. Public safety organizations are turning to mobile handheld solutions to provide responders with applications that increase situational awareness, enhance tactical collaboration and enable greater in-field productivity to address these challenges.
