AN ENTERPRISE APP STORE FOR MANAGING AND DELIVERING MOBILE APPS

RhoGallery

RhoGallery is a mobile application management solution that provides an enterprise app store to help developers and IT departments manage and deliver a collection of applications to mobile devices. Part of RhoHub, this mobile application management solution allows developers to easily deliver applications to clients and IT to easily deliver applications to employees.

BY INVITATION ONLY
Since galleries are only accessible by invitation, you are assured that only authorized users can download applications in a specific gallery.

ONE-STEP DOWNLOAD
Simply send a text or email with a link to a gallery — a single click on that link will download the gallery and give the user access to all the applications in that gallery on the user's mobile device.

AUTOMATIC UPDATES
When you upload an updated application into a gallery, all users that have access to that gallery will receive a text or email notification that an update is available, complete with a link to the gallery.

EXTRA SECURITY
In the event a device is stolen or a worker is terminated, you can easily wipe enterprise apps and their associated data. And while you can configure applications to launch on their own, you can also choose to require the RhoGallery Launcher App to open all applications. The added benefit is increased security — you can easily permanently disable app and data access, even when the operating system won't allow the removal of an installed app.

ADMINISTRATOR CONTROLS
Administrators can easily add and remove other administrators, add and remove apps from RhoGalleries, as well as add and remove gallery users.

Get the mobile application management solution that makes it easy to deploy, update and secure your applications. To find out how, visit www.motorolasolutions.com/RhoGallery or access our global contact directory at www.motorolasolutions.com/contactus

RhoMobile Suite — It's always what's next.

RhoMobile Suite; developer-centered, enterprise-focused, future-ready. With countless ways forward, it's always what's next.

RhoMobile Suite is a powerful set of development tools that help businesses mobilize their workers, no matter what technology is in their hands. With RhoMobile Suite, you can develop, integrate, host and manage applications that work across platforms, from iOS to Android to Windows Mobile to systems that don't even exist yet, on both consumer and enterprise devices. RhoMobile Suite includes:

RhoElements: Cross platform development framework for enterprise applications

Rhodes: Cross platform development framework for consumer applications

RhoStudio: One tool simplicity for application development, debugging and testing

RhoConnect: The fastest and easiest integration of backend business data to mobile devices

RhoHub: Hosted services that simplify mobile application development and deployment

RhoGallery: An enterprise app store to deploy, manage and secure mobile apps
