

Avigilon Presence Detector

Accurately Detect the Presence of a Person

The Avigilon Presence Detector (APD) is a small form-factor impulse radar device with self-learning radar analytics that helps to solve the challenge of human presence detection in indoor areas where traditional devices may be limited. The APD™ sensor provides extremely high accuracy at distances up to 9 meters (30 feet) from the sensor, even if the person is hidden or obstructed by objects such as blankets, cardboard, wood or drywall.

Features

EASY INSTALLATION

Available in surface, corner or wall mount options, the APD sensor uses standard IP security camera infrastructure and cabling

COMPLETE PRIVACY

Using radar technology for detection, the APD sensor ensures complete privacy as it does not capture or display items such as ATM keypads or faces

RELAY I/O CONNECTIONS

Configure input/output actions and alarms for fast event response

VMS INTEGRATION

Integrates with Avigilon Control Center™ video management software to provide accurate alarm notifications of important events so that you can take action

Respiration and Motion

Motion Only

Conceptual diagram, not built to scale.

Impulse Radar Technology

Effectively detects people even when they are not moving while also being able to detect fine motion, such as breathing, to alert you of the presence of a person.
