

H4 Edge Solution (ES) Camera Line

The H4 Edge Solution Camera line combines high-definition imaging, self-learning video analytics, network video recorder functionality, and embedded Avigilon Control Center[™] video management software to create an all-in-one intelligent surveillance solution.

Onboard Solid-State Drive (SSD) storage

The H4 Edge Solution Camera records video directly to an onboard solid-state drive, eliminates the need for a separate network video recorder, and reduces installation and system costs.

Avigilon Control Center (ACC Software) Built-in

The H4 Edge Solution Camera line provides unique flexibility and versatility, with deployment options ranging from standalone installation, multicamera solutions, to seamless integration into a conventional network video surveillance system.

As an Internet of Things device, the solution acts as both a camera and out-of-the-box video management software platform, providing a uniquely easy-to-install and cost-effective surveillance solution.

Avigilon HDSM SmartCodec technology[™] H4 platform optimizes the video stream in real time using automatic ROI encoding to save bandwidth and storage requirements while maintaining image quality.

KEY FEATURES

1-3 megapixel models

Factory installed and licensed with ACC Video Management software running on the camera

Up to 256 GB on-board Solid-State Drive (SSD)

Up to 30 days of video retention

Self-learning video analytics

Patented Advanced Video Pattern Detection and Teach by Example Technology

Patented High Definition Stream Management (HDSM)[™] Technology maintains image quality while reducing bandwidth

Idle Scene Mode lowers the bandwidth and storage usage if there are no motion events detected in the scene

Wifi camera configuration support

Avigilon LightCatcher[™] technology provides exceptional image quality in low light environments

Triple Exposure Ultra Wide Dynamic Range

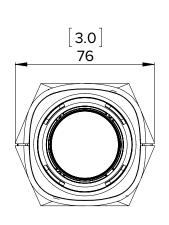

Avigilon HDSM SmartCodec technology for reduce bandwidth and storage requirements

SUPPORTED RULE BASED VIDEO ANALYTICS EVENTS	Objects in Area	The event is triggered when the selected object type moves into the region of interest.						
	Object Loitering	The event is triggered when the selected object type stays within the region of interest for an extended amount of time.						
	Objects Crossing Beam	The event is triggered when the specified number of objects have crossed the directional beam that is configured over the camera's field of view. The beam can be unidirectional or bidirectional.						
	Object Appears or Enters Area	The event is triggered by each object that enters the region of interest. This event can be used to count objects.						
	Object Not Present in Area	The event is triggered when no objects are present in the region of interest.						
	Objects Enter Area	The event is triggered when the specified number of objects have entered the region of interest.						
	Objects Leave Area	The event is triggered when the specified number of objects have left the region of interest.						
	Object Stops in Area	The event is triggered when an object in a region of interest stops moving for the specified threshold time.						
	Direction Violated	The event is triggered when an object moves in the prohibited direction of travel.						
	Tamper Detection	The event is triggered when the scene unexpectedly changes.						
SUPPORTED ACC FEATURES	System	 1 camera per server (connection to self) 2 simultaneous client connections (override supported) Site supports up to 200 cameras and a total of 100 defined users. H4 ES Cameras can be part of a site with 15 other H4 ES Cameras, ACC ES HD Recorders, or ACC servers 						
	Recording Rate	12 Mbps						
	Stream Out Rate	24 Mbps						
	Client	Saved Views Maps Web pages Collaborative investigations						
	Recording, Searching and Playback	 Hourly configurable recording schedule Intelligent motion search Live export Video archiving Thumbnail search Event search Alarm search 						
	Integrations	All 3rd party integrations via the ACC SDK Plus: CommScope iPatch DDS Amadeus 5 RS2 AccessIt! DSX						
	Additional Features	 Email event notification Unlimited rule triggers Digital input email trigger Failover connections Manual digital output trigger Audio recording and talkdown *Redundant recording *Depending on level of site activity (site, camera, analytics, etc), redundant recording to a secondary server may exhibit a degradation in performance.
