

PUSH-TO-TALK AS A SERVICE MAKES ANY SIZE DEPLOYMENT EASY AND AFFORDABLE.

WAVE CLOUD CONNECT

Today, virtually any organisation – from the smallest agency to the largest company – can benefit from push-to-talk (PTT) communications across the entire enterprise. PTT communications brings immediacy and spontaneity to connect different personnel regardless of their location so they can collaborate efficiently and seamlessly.

So look to the cloud. With WAVE Cloud Connect you can enjoy the scalability, flexibility and cost-benefits of a network-independent, cloud-based push-to-talk service with a low monthly subscription fee that makes even the smallest WAVE deployments easy and affordable.

WAVE Cloud Connect is powered by WAVE™, operated by Motorola Solutions. WAVE Cloud Connect include optional radio network integration via donor radio on any vendor system and wireline integration to P25 digital radio systems via ISSI.

POWERFUL, FLEXIBLE, AFFORDABLE

WAVE Cloud Connect turns Apple or Android smartphones or tablets into network independent push-to-talk devices for instant, reliable and secure mobile workforce communications. Users can communicate with almost any other device over any broadband data network. You can also PTT from your desktop or laptop PC.

WAVE Cloud Connect works with all providers so that you can keep the service you currently have or chose an appropriate provider based on the voice and data plans that fit your specific needs.

WAVE CLOUD CONNECT

CLOUD DELIVERY OVER BROADBAND IS ALL BENEFIT

With WAVE Cloud Connect you enjoy all the benefits of service-based delivery, including:

Get it Quickly

There's no need to install and configure software on your own servers, which can take time and resources. With WAVE Cloud Connect the software is ready to go in the cloud.

Use Any Smartphone or Data Network

Whether it's a consumer-grade iPhone/iPad or Android phone/tablet, or a ruggedised custom handheld like the Motorola LEX L10, you likely already have a device that will work with WAVE Cloud Connect.

Push-to-Talk from Your PC

Users with access to a PC can also use WAVE push-to-talk applications to speak with team members and co-workers on their mobile devices and monitor their locations.

Highly Scalable

Up to 3,000 users. There's no need to concern yourself with system scalability and server capacity. WAVE Cloud Connect grows with your needs while the per-user subscription cost remains the same.

Low Monthly Subscription

WAVE Cloud Connect requires no upfront capital outlay for software components, server hardware or system related features. You only pay the monthly per-user subscription fee. And you can add or remove users at any time with no penalties.

Enjoy the Latest Capabilities

Whenever the WAVE Cloud Connect service or client applications get upgraded, you benefit. There is no need to purchase and install updates on your own servers or devices.

Optional radio integration

- To ISSI interface
- To donor radio interface
- Capital upfront or wrapped up into a monthly fee over an agreed term.

WAVE CLOUD CONNECT CLIENT APPLICATIONS

WAVE Communicators Enable Your Workforce to Connect and Collaborate

Whatever the device or available network, WAVE has client applications that meet the needs of all types of users. Called WAVE Communicators, these applications provide the user interface to a WAVE communications system:

WAVE MOBILE COMMUNICATOR

Turn Your Apple or Android Device into a

Multi-Channel PTT Handset

Not everyone needs or wants to carry a radio handset. But they do want instant, secure access to important, often mission-critical communications wherever they are located.

With a WAVE Mobile Communicator installed on your Apple or Android smartphone, or on a ruggedized handheld like the Motorola LEX L10, users can PTT from any location, talking with groups or individuals as required. Mapping, presence and channel activity monitoring improve situational awareness for everyone.

WAVE DESKTOP COMMUNICATOR

Access PTT Communications from Your Desktop PC

You're not a mobile worker in the field responding to events and service calls, but you're there to provide support from headquarters, a communications center or a remote location. Let's turn your desktop PC into a PTT communications hub
