TLK SERIES TWO-WAY RADIOS THE CLEAR CHOICE, HANDS DOWN

GET DOWN TO BUSINESS WITH A TWO-WAY RADIO DEVICE THAT'S RELIABLE, EFFICIENT, AND EASY TO USE. BUILT FOR INDUSTRIES LIKE CONSTRUCTION, TRANSPORTATION, ENERGY, PRIVATE SECURITY, AND MORE, THE TLK TWO-WAY RADIO IS ULTRA POWERFUL. YET SUPER SIMPLE.

The preferred choice for safe mobile connections, the TLK 100 portable and TLK 150 mobile two-way radios are compliant with US Federal Motor Carrier Safety Administration (FMCSA) regulations for driver distraction. One button push-to-talk makes it easy for employees to connect. Because they don't have to unlock it to use it, the TLK Series is ideal for situations when every second counts. And without a screen, employees stay more focused—no apps, texting, or dialing.

Lower your cost of ownership and eliminate IT headaches with less to break, fix or maintain. With the TLK Series two-way radio, your team has everything they need. And nothing they don't.

IT'S RADIO AND THEN SOME

A month-to-month plan keeps costs under control. Managing your fleet is simple, since you can deliver updates over the air without needing to touch a single device or handle any radio programming cables. Modify your talkgroups remotely and in real-time without having to call customer service.

Whether you're managing 10 devices or a fleet of 10,000, minimizing administration time can save your business a ton. WAVE makes management simple, because every TLK two-way radio includes built-in capabilities with the cost of your subscription. So you can change talkgroups, modify device names, add Wi-Fi credentials, or disable devices—all in seconds, not hours—without touching a single device.

TLK Series two-way radios keep communication simple and quick, so you can focus on driving business results.

EXTEND TWO-WAY RADIO TO BROADBAND

UNIFY COMMUNICATIONS ACROSS RADIO AND BROADBAND USERS.

Eliminate communication barriers between the traditional office space and the commercial and industrial areas. Connect WAVE to your MOTOTRBO™ system and get seamless talkgroup communication between radio and smartphone users.
